For B.Sc.B.Ed., B.A.B.Ed. & B.El.Ed. 3rd Semester Students

Date : 14th October, 2019 -23rd October, 2019 | Venue : Computer Centre

PHOTOGRAPHY

About the Program

Photography is the art of capturing light with a camera, usually via a digital sensor or film, to create an image. With the right camera equipment, you can even photograph wavelengths of light invisible to the human eye, including UV, infrared, and radio.

The first permanent photograph was captured in 1826 (some sources say 1827) by Joseph Nicéphore Niépce in France.

The photograph is evident in nearly every aspect of modern life. As a form of communication and documentation, photographs are present in newspapers, magazines, advertisements, posters, television, the Internet, passports, ID cards, archives, security and Surveillance Systems, forensics and medicine. Photography also plays an important role in domestic and recreational activities. Most photographs produced today take the form of snapshots documenting activities such as holidays and celebrations. With the prevalence of digital cameras and mobile phone cameras, these activities are also documented for display on photo-sharing websites and photo-based Social Networking Sites. Despite the prevalence of photography in many aspects of modern life, only a small minority of photographs are considered to be art and tend to be displayed in museums and galleries in formats similar to painting.

The invention of photography is a contested subject. It was the outcome of many technological developments, most notably associated with the Industrial Revolution in the nineteenth century, but was also influenced by earlier technological developments such as the Camera obscura, which is an optical device used during the Renaissance to aid drawing and perspective.

PHOTOGRAPHY

Course Code: VAPE401

Contact Hours: 30

Course Objectives/Learning Outcomes

- Demonstrate artistry by creating images that evoke an emotional response. Apply the principles of lighting and colour theory to a variety of photographic scenarios by measuring, evaluating, and adjusting light and colour to create quality images.
- Apply the mechanics of exposure to control light and influence the final product Apply principles of composition to produce professional images.
- Select and use photographic equipment and technologies appropriate to the task.
- Demonstrate effective use of written, verbal, and non-verbal communication, employing relevant knowledge, skills, and judgment in a business setting
- Work as a professional, maintaining high standards of practice, make ethical judgments and decisions, follow legal requirements, and adapt to a rapidly changing work environment through demonstrated commitment to lifelong learning and professional associations.
- Work effectively individually and as a member of team, demonstrating time management, organizational and interpersonal skills.
- Develop proposals and organize and orchestrate photo shoots through the successful management of resources and time
- Apply business processes through the application of accounting, marketing sales, data management, and human resources (HR) practices and principles.
- Use and adapt to a variety of computer software and hardware for both photographic and business purposes.

UNIT I

Photographic equipment camera- types formats- lens- their types and functions film digital photography-types and functions accessories.

UNIT II

Shots focus shutter speed selection of subject different types of photographs action photo editing procedure pictures for newspaper and magazines & websites developing photographers manual and computerized photography

UNIT-III

Photographing people; portrait and still, wildlife environment, sports, landscape, industrial disasters; photography for advertising; conflicts-war, political and social photography.
