

## **ABOUT US**

The National Service Scheme (NSS) at Invertis University, Bareilly, is a student-centered community service program dedicated to instilling a sense of social responsibility, empathy, and leadership among our students. Founded on the principles of "Not Me But You," NSS at Invertis aims to develop students into proactive citizens who are sensitive to the needs of society and committed to making a positive difference.

Through a series of thoughtfully designed activities and outreach programs, our NSS unit fosters hands-on involvement in social issues such as health and hygiene, environmental conservation, education, and rural development. We collaborate with local communities, schools, and organizations to create lasting impacts while providing students with invaluable life skills, practical experience, and a broadened world perspective.

Our programs include regular community engagements, awareness campaigns, and skill development workshops, as well as special initiatives like health camps, cleanliness drives, and eco-friendly projects. Each NSS volunteer at Invertis University is encouraged to embrace the ideals of unity, discipline, and selfless service, shaping them into capable leaders who are ready to contribute to society with integrity and compassion.

As an NSS unit, we strive to build a bridge between academia and society, reinforcing our commitment to both education and community welfare. Join us on this journey of learning, service, and transformation as we work toward a brighter, more inclusive future for all.
